With their high-quality microfiber, the mops can absorb +500% of their own weight. The mops can also be washed more than 500 times when washed correctly, which reduces the need to buy new mops. Wash at max. 95° C. Use 1/3 of the detergent recommended dose. Do not use fabric softener. Dry in a humidified tumble dryer or in airing cupboard, maximum temperature of 60°C. Resistant to chlorine and alcohol. Maximum shrinkage 2%. Floors with rough surfaces shorten the life of the mop.

Tip for priming: 1dl water = 10 m²

The Global Recycled Standard (GRS) is a voluntary product standard for recycled materials.

The standard sets the criteria for enhancing the use of recycled materials in a trustworthy manner - while also ensuring decent working conditions for the people manufacturing the products and that products are produced with respect for the environment.
