COMMITMENT TO ACHIEVING NET ZERO

Abena UK Ltd is committed to achieving Net Zero emissions by 2040.

Abena UK Ltd is an SME, single site base (Coventry) employing circa 30 staff.

BASELINE EMISSIONS FOOTPRINT

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

This is our first year of reporting our greenhouse emissions.

BASELINE YEAR 2021/2022

Our Scope 1 reference emissions were calculated using data for Natural Gas, diesel and petrol between May 2021 and April 2022.

Our Scope 2 reference emissions were calculated using actual energy (electricity) usage data between May 2021 and April 2022.

Our Scope 3 reference emissions were calculated using actual data from: business travel, and waste disposal records between May 2021 and April 2022.

The calculation of CO₂e was carried out using government conversion factors for company reporting of greenhouse gas emissions.

EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	49.9
Scope 2	64.5
Scope 3	151.1
Total Emissions in 2021/2022	265.5

CURRENT EMISSIONS REPORTING

CURRENT YEAR 2021/2022*	
<p>Our Scope 1 reference emissions were calculated using data for Natural Gas, diesel and petrol between May 2021 and April 2022.</p> <p>Our Scope 2 reference emissions were calculated using actual energy (electricity) usage data between May 2021 and April 2022.</p> <p>Our Scope 3 reference emissions were calculated using actual data from: business travel, and waste disposal records between May 2021 and April 2022.</p> <p>The calculation of CO2e was carried out using government conversion factors for company reporting of greenhouse gas emissions.</p>	
EMISSIONS	TOTAL (tCO2e)
Scope 1	49.9
Scope 2	64.5
Scope 3	151.1
Total Emissions in 2021/2022	265.5

*2022/2023 figures will be available Autumn 2023

This is our first year of reporting so we lack baseline data from before May 2021, therefore no comparisons can be made yet.

EMISSION REDUCTION TARGETS

In order to continue our progress toward achieving Net Zero, we have adopted the following carbon reduction targets.

- Over 95% of goods received into Abena UK arrive from Abena Global Manufacturing facilities (Denmark) and are covered by the Abena Sustainability Report 2021 – 2022: [Abena - Sustainability in ABENA](#). This means that by 2030 goods delivered into Abena UK for onward distributions will be supported by:
 - 70% Biobased products
 - 70% CO2 reduction
 - 70% Eco labeled products

FUTURE CARBON REDUCTION INITIATIVES

Future carbon reduction initiatives include:

- Engaging OAK Network Ltd to identify and reduce electricity consumption year on year. Year 1 reduction (2023/2024) the target is 10%+ reduction of current scope 2 emissions
- Reduce both business mileage (Scope 1) and employee commuter mileage (Scope 3) through increased hybrid working and switching at least 2 main business users cars to fully electric vehicles. Year 1 reduction (2023/2024) the target is 10%+ reduction and will be achieved by:
 - ✓ EV charging point installed in car park
 - ✓ EV charging point will be initially free of charge for Abena UK employees during working hours
 - ✓ Showers installed, lockers and secure facility available to encourage cycle to work.
- During 2023/2024 the office will achieve a zero to landfill status
- Commencing 2023/2024 Partnerships with Distributors and contracted courier services (Scope 3) will include monthly discussions and measurements of opportunities that directly relate to the carrying of Abena UK goods to patients homes, NHS care settings and commercial distribution storage facilities. The top 10 distributors are currently being identified for data capture and engagement.

DECLARATION AND SIGN OFF

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standards for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the CHG Reporting protocol corporate standard and uses the appropriate Government emission conversion for greenhouse gas company reporting.

Scope 1 , Scope 2 and Scope 3 data has also been collected and supplied to Abena Denmark for Global Reporting in the 2021-2022 Sustainability Report "An Important Step Forward".

Signed on behalf of Abena UK Ltd:

Julia Harrison Chief Executive Officer

Date: 1st May 2023
